📝 My Blog - Holy Grail Layout

Welcome to **My Blog**, a clean and responsive web layout project that demonstrates the classic **Holy Grail Layout** using pure HTML and CSS. This layout is often used in modern web designs due to its flexible and user-friendly structure.

🌟 Features

- ✅ Responsive design (mobile-first)
- ✅ Semantic HTML structure
- ✅ Grid-based layout
- ✅ Two sidebars and a central main content area
- ✅ Adaptive images with `object-fit` and `border-radius`
- ✅ Clean and minimal visual style

📁 Project Structure

```
├── index.html        # Main HTML file
├── index.css         # CSS styling for layout and responsiveness
└── README.md         # Project description and instructions
```

🥾 Technologies Used

- HTML5
- CSS3 (Grid, Flexbox, Media Queries)

🚀 Getting Started

To view the project:

1. Clone the repository:

bash

CopyEdit

git clone https://github.com/your-username/your-repo-name.git

1. Open the project folder and double-click index.html*(No server required – it's a static HTML project)*
